ANNUAL CONTEST.

cutionary Exercises.

The annual elecutionary contest of St. John's College, this city, was held last evening, and twenty-one students of the first and second classes participated. The gold medal was awarded to Harry S. Lucas, who recited "The Song of the Market Place," by James Buckham. Dennis E. Connell was awarded second honors for his recital of "The Battle of Fontenoy," while third honors went to James E. Nolan, whose selection was "The Fate of Virginia." The ages of the contestants ranged from twelve to sixteen years. Brother Abdas, president of the college, presided, and the board of judges consisted of Rev. Martin J. O'Donoghue, J. H. P. Benson, D. D. S., Brother Abraham, Louis A. Dent, Rev. Eugene Hannan, William H. De Lacy, Wilton J. Lambert, Dr. John F. Moran and Dr. John J. Slattery. The contestants were: Leo F. Conroy, Oswald M. Cook, Philip H. Dougherty, Augustus F. Dreka, Joseph T. Fitzgerald, Donald E. Gensler, John J. Kennedy, jr., Harry S. Lucas, W. Stanley Mathews, Francis S. Milovich, Mar-S. O'Connor, James A. O'Toole, Edward J. Ralph, Adolph T. Schafhirt, John J. Blandin, Emmanuel A. Chaffiot, Dennis E. Connell, Joseph J. Cook and E. Clinton Daly. These members of the class officiated on the reception committee: Charles A. Clements, Rezin A. Farr, Robert L. Harris, Joseph C. Elbert, William A. Finkelstein

Stephen O'Donnell and Aubrey B. Witter. Many guests were present. A musical program was rendered under the direction of Prof. Scharf, those partici-pating being Edward J. Ralph, Charles Clements, Albert Gannon, Ruth Davis, Nina Davis, Bay Hencely

Nina Davis, Ray Heacock. One Hour for Clerks' Lunch Suggested

To the Editor of The Evening Star: That the general allowance of one-half hour for department clerks' lunch is insufficient for such purpose is daily realized by the great army performing service for the government in Washington. The large portion prefer to go out for lunch, and at the same time enjoy a feast of fresh air and a little exercise so much needed by those who sit at their desks absorbed in the routine work of the office from 9 a.m. to 4 p.m., walk from one to six squares from the department to enjoy at least a small portion of food, the fuel which is to keep the engine in working trim for three or four hours more. They find it next to impossible to do this properly within the thirty minutes allo ted. Doubtless a great deal of the indigestion, dyspepsia and shattered nerves so common among this class is due largely to the manner in which they are obliged to take their noon-day repast.

Now the remedy—one hour instead of half an hour—would doubtless be favored by a large majority of the employes; a half hour, if necessary, to be added to the beginning or close of the day's work. Then, too, there would be some chance for the brief transaction of business during the noon hour, which, because of closed doors, cannot be done before 9 or after 4 o'clock. The idea has been suggested by the writer minutes allotted. Doubtless a great deal of The idea has been suggested by the writer to many fellow clerks and it is almost unanimously indorsed by them. It is hoped that the opinions of others concerned may be given, and that the desired reform may be effected if generally desired.

REMARKABLE SUCCESS

OF A NEW CATARRH CURE. A large and constantly increasing majority the American people are catarrh sufferers. This is not entirely the result of our changeable climate, but because modern investigation has clearly proven that many diseases, known by other names, are really catarrh. Formerly the name catarrh was applied almost exclusively to the common nasal catarrh, but the throat, stomach, liver, bladder kidneys and intestines are subject to catarrhal disforty-five minutes before sunrise. eases as well as the nasal pasages. In fact, wherever there is mucous membrar

The usual remedies, inhalers, sprays, douches o owders, have been practically failures, as far as anything more than temporary relief was con-cerned, because they simply dry up the mucous se-cretions, without having the remotest effect upon the blood and liver, which are the real sources It has been known for some years that the rad
